REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: No prior art has been found that either teaches or fairly suggests the production of a bimodal polypropylene blend comprising from 50 to 70 wt% of a first high molecular weight fraction and from 50 to 30 wt% of a second low molecular weight fraction and having a melt dispersion index of from 8 to 70 and a ratio M_z/M_n of at least 10 and processing the blend in the melt by drawing and cooling the blend to form a solid product, as herein claimed. With applicants' amendment of 20 October 2003, the incorporation of subject matter from claim 25 into claim 21 removes any basis for a rejection of claims under either section 35 U.S.C. 102 or 35 U.S.C. 103 in view of the reference to Okada et al, since that subject matter was neither taught nor suggested by Okada et al. Since there are no other outstanding issues with regard to the clarity or enablement of the claims, these claims are deemed to contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
